

COMMUNITIES IN CRISIS

More than half of Illinois cities get “F” grades for local pensions

University Park

2019 Grade: D

In 2003, University Park’s police, fire and municipal pension funds already faced a shortfall of **\$1.3 million**. That meant every University Park household, on average, was on the hook for **\$587** in future taxes just to eliminate that shortfall.

University Park began contributing more money – taxpayer dollars – to pensions in an attempt to make the plans healthier. Over the next 16 years, city contributions increasingly crowded out spending for public safety, roads and other core services.

| | 2003 | 2019 | Change |
|---|----------------|----------------|---------|
| City (taxpayer) contributions to pensions | \$0.42 million | \$1.12 million | Up 2.7X |
| Share of city general budget for pensions | 8.6% | 11.3% | Up 1.3X |

Despite the ramp-up in city payments over those 16 years, University Park’s pension debts didn’t decrease. Instead, they jumped by 9.8 times!

By 2019, the shortfall in University Park’s police, fire and municipal pension funds totaled **\$12.4 million**. That means each University Park household, on average, is now on the hook for **\$5,063** in debt.

Everyone loses under University Park’s pension crisis:

Taxpayers are tapped out

University Park residents are paying more and more into a broken system. City taxpayers in 2019 contributed 2.7 times more to pensions than in 2003, yet city debts are 9.8 times larger.

Pension costs are devouring the city’s budget

University Park pension contributions have grown to consume 11.3% of the city’s budget, up from 8.6% in 2003. That’s crowded out spending on public safety, roads and other core services.

University Park worker retirement security is collapsing

The health of University Park’s local pension plans have worsened despite those increased taxpayer contributions. In 2003, the plans had 87.5% of the money they needed. By 2019, that had dropped to just 61.5%.

University Park’s crisis will only get worse

University Park has fewer active government workers available to help pay for a growing number of retirees. In 2003, there were 7.17 active workers for every pensioner. By 2019, there were 1.00 active workers per pensioner.

2019 GRADE

2003 GRADE

University Park receives a “D” grade for its local pension crisis

Local officials handcuffed by state pension mandates.

Wirepoints quantified the negative impact of local pensions by examining the finances of Illinois’ 175 largest cities from 2003 to 2019. The analysis was based on ten equally-weighted metrics. Cities were given an A through F grade based on a 100-point scale (10 points per metric).*

University Park received a “D” grade in 2019. The city’s total score dropped from 84 in 2003 to 64 in 2019, a decline of 20 points.

University Park was one of 64 cities to receive a “D” grade in 2019.
